

Barnardo's Beacon Service

Barnardo's are proud to be launching a service to support victims and survivors of child sexual abuse across:

Birmingham

Sandwell

Walsall

Coventry

Staffordshire

Warwickshire

Dudley

Stoke on Trent

Wolverhampton

Herefordshire

Telford and Wrekin

Worcestershire

Our service will support and develop a local response for young people aged 0-19 by:

Developing an on-line information sharing hub

for children, young people, families and professionals to find useful information on how to support themselves and others. You will also be able to find out more about local support networks available to support you.

Providing support for organisations

that work with children affected by sexual abuse by delivering training and consultancy packages. We will also give support to other partners to deliver counselling/services for children.

Delivering counselling and therapeutic sessions

to children/young people where service access is limited due to the capacity of local providers; where there may be a lack of provision in an area and where a child or young person may have a unique or complex set of circumstances.
